

Terms

License for the files and terms of the implementation and guidance services

Version 1.0 · effective 16 September 2026 · Licensor: Sunpot Corporation (British Virgin Islands), Reg. No. 1943422

In short. You may use the 40 workflows in one business and adapt them for your own needs, but not resell or share them. Our team sets up 12 workflows on your accounts and guides you for 60 days from the kickoff call; you receive workflow updates for 12 months. Autopilot is not an accounting system and never has access to your funds. The Licensor's liability is limited to the price paid. Governing law: British Virgin Islands. This summary does not replace the text below.

1. Definitions

- 1.1 Licensor, "we", "us":** Sunpot Corporation, a company registered in the British Virgin Islands.
- 1.2 Licensee, "you":** the business (legal entity or sole proprietorship) that pays for Sunpot Autopilot.
- 1.3 Autopilot:** the package sold under the name Sunpot Autopilot, consisting of the Files and the Services.
- 1.4 Files:** the library of automation files – 40 n8n workflow files, their instructions in English and Russian, Google Sheets templates, catalogs and guides – and any updates to them provided by the Licensor.
- 1.5 Services:** the 12 implementations, the 60-day guidance and the delivery of updates described in section 5.
- 1.6 Kickoff:** the kickoff audit call between the Licensor and the Licensee held after the Licensee submits the intake form.

2. Subject matter and acceptance

- 2.1** The Licensor grants the Licensee a non-exclusive, non-transferable, perpetual license to use the Files on the terms of section 3, and provides the Services on the terms of section 5.
- 2.2** Acceptance of these Terms is payment of the invoice. The price is USD 5,000, paid once.
- 2.3** Delivery of the Files is digital, immediately upon payment confirmation, by a download link. The Licensee confirms consent to immediate delivery of digital content and to the start of the Services before the end of any withdrawal period, and acknowledges the resulting waiver of the EU right of withdrawal for digital content to the extent permitted by applicable law.

3. License: what you may and may not do

- 3.1 You may:** use the Files in one business of the Licensee (one legal entity or sole proprietorship) on any number of the Licensee's own n8n instances and servers; modify and adapt the workflows for your own needs; hand the configured workflows to your own employees, accountant or contractor who works for the Licensee.

- 3.2 You may not:** resell, publish, distribute or share the Files or any part of them, including modified versions; include the workflows in your own products or services for sale; use the Files to provide setup or automation services to third parties without a partner agreement with the Licensor.
- 3.3 Several businesses:** use across several legal entities requires one license per entity, or partner terms agreed with the Licensor in writing.
- 3.4** A breach of section 3.2 ends the license and the Services without refund, in addition to any other remedy available to the Licensor.

4. Intellectual property

- 4.1** The Files, including their structure, logic, texts and templates, are the intellectual property of the Licensor. The Licensee receives a license to use them, not ownership. All rights not expressly granted are reserved.
- 4.2** The Licensee's data, accounts, Config values and business content remain the property of the Licensee. The Licensor acquires no rights to them.
- 4.3** Changes that the Licensor makes to the workflows for the Licensee during the Services are part of the Files and are licensed to the Licensee on the terms of section 3. The Licensor may use general, non-confidential know-how gained during the Services to improve Autopilot, without using or disclosing the Licensee's data.
- 4.4** n8n, Google, Telegram, OpenRouter and other third-party names and services belong to their respective owners and are used under their own terms.

5. Implementation and guidance services

- 5.1 Scope.** The Services consist of:
- **12 implementations.** One implementation is one of the 40 workflows, chosen together with the Licensee, that the Licensor imports into the Licensee's n8n, connects to the Licensee's accounts, configures (Config and the settings described in its instruction, with reasonable adjustments within the workflow), tests live on a real case with the Licensee, connects to the error alert workflow and switches on. The same workflow set up again for a separate account or process counts as a separate implementation.
 - **Guidance for 60 days from the Kickoff:** an audit of the Licensee's processes, a written plan of the 12 implementations, an AI + n8n roadmap for the Licensee's business, answers to questions by e-mail (reply within 24–48 hours on business days) and calls scheduled in the plan, and a handover of the implemented workflows.
 - **Updates for 12 months from the purchase date:** new versions of the Files, sent by e-mail.
- 5.2 Timeline.** The Licensor schedules the Kickoff within 2 business days of receiving the completed intake form. Setup of the 12 implementations normally takes 4–6 weeks. Timelines depend on the Licensee providing accounts, access and answers in time.

5.3 Licensee's responsibilities. The Licensee:

- holds and pays for its own accounts: n8n (n8n Cloud or its own server), Google, Telegram, OpenRouter, SunpotPay and any other service a chosen workflow needs;
- gives the Licensor the access needed for setup (for example, a user account in its n8n and access to the relevant spreadsheets) and removes it after handover if it wishes;
- enters API keys, tokens and passwords into n8n credentials, and webhook signing secrets into an environment variable of its n8n server (or, on n8n Cloud, into the Config step), itself or together with the Licensor on a shared screen, and does not send them to the Licensor by e-mail or chat;
- answers questions, confirms the plan and takes part in live tests within a reasonable time, normally within 3 business days;
- reviews and approves the rules, thresholds and message texts used in its workflows, and decides whether to enable any auto-send mode.

5.4 Out of scope unless agreed in writing for an additional fee:

- custom development beyond the 40 workflows, including new workflows and integrations with services not used by the 40;
- third-party fees: n8n plans, hosting and servers, Google Workspace, SunpotPay, data sources and any other subscription;
- AI usage costs, which the Licensee pays to OpenRouter through its own key;
- hosting, administration, security and backups of the Licensee's n8n instance or servers;
- data migration, cleaning of historical data, and staff training beyond the handover;
- accounting, tax, legal or compliance advice.

5.5 Expiry. Implementations not used by the end of the 60-day guidance period expire without compensation. If a delay is caused by the Licensor, the guidance period is extended by the length of that delay.

5.6 Start of guidance. If the Kickoff has not taken place within 90 days after payment for reasons on the Licensee's side, the guidance period is considered to have started on day 90 after payment.

5.7 Access and confidentiality. The Licensor uses the access and information received from the Licensee only to provide the Services, keeps them confidential, does not copy the Licensee's business data outside the Licensee's accounts except where needed for a specific task agreed with the Licensee, and stops using the access at handover or at the end of the guidance period, whichever comes last.

6. Updates and support

6.1 Updates are provided for 12 months from the purchase date, by e-mail. After that period the Licensee keeps the last version received; further updates may be offered on the terms published by the Licensor at that time.

6.2 Outside the guidance period, support is asynchronous, by e-mail to support@sunpot.co, limited to questions about installing the Files and their updates, with a reply within 24–48 hours on business days during the update period. Consultations and calls outside the guidance period are not included.

7. Important disclaimers

- 7.1 **Autopilot is not an accounting system** and is not accounting, tax or legal advice. It can prepare data and feed it into the Licensee's own accounting system. Compliance of the Licensee's records and reporting with the requirements of its jurisdiction is confirmed by the Licensee's own accountant and advisers.
- 7.2 The screening workflows (F13 address screening, F14 counterparty check) use public sanctions lists and public registers "as is". They support the Licensee's process but do not replace the judgment of a person and a lawyer when a flag is raised.
- 7.3 Autopilot has no access to funds: the workflows work with read-only keys (for example, a SunpotPay API key limited to viewing invoices) and never require a seed phrase or wallet private keys. In providing Autopilot the Licensor does not act as a payment service provider or a crypto-asset service provider. A SunpotPay store is governed by its own terms.
- 7.4 AI steps may produce inaccurate results. The workflows are designed so that AI extracts data and fixed rules decide, and so that messages to customers are saved as drafts or wait for approval. The Licensee remains responsible for reviewing items marked for review and for any message it approves or sends automatically.
- 7.5 Dependencies: n8n, Google, Telegram, OpenRouter, SunpotPay, exchange and rate sources and other APIs are third-party services. Their changes may require updates to the workflows, which are covered by section 6.1 during the update period.

8. Warranty disclaimer

- 8.1 The Licensor performs the Services with reasonable skill and care. The workflows have passed automated logic tests on n8n 2.38.7, and each implementation is tested live with the Licensee before it is switched on.
- 8.2 Apart from section 8.1, the Files are provided "as is" and "as available". To the maximum extent permitted by law, the Licensor gives no other warranties, express or implied, including warranties of merchantability, fitness for a particular purpose, uninterrupted or error-free operation, or that the Files will work with future versions of n8n or third-party services.

9. Refunds

- 9.1 Full refund within 14 days of payment if the archive has not been downloaded and the Kickoff has not taken place.
- 9.2 After the archive has been downloaded or the Kickoff has taken place, no refund is given (digital content with immediate delivery and services started at the Licensee's request), except where the core workflows (blocks O Reliability and F Payments & controls) are non-functional on a supported n8n version and support fails to fix this within 14 days of the Licensee's written report.
- 9.3 Refunds are paid to the original payment method or, where that is not possible, by another method agreed with the Licensee.

10. Liability

- 10.1 The Licensor's aggregate liability under these Terms, for the Files and the Services together, is limited to the price paid.

- 10.2** The Licensor is not liable for decisions made on the basis of the workflows' data, for errors, outages or changes of third-party APIs and services, for the consequences of changes the Licensee makes to the workflows, for messages the Licensee approves or sends automatically, or for indirect or consequential losses, including lost profit and lost data.
- 10.3** Nothing in these Terms limits liability that cannot be limited under applicable law.

11. Miscellaneous

- 11.1** Governing law: the laws of the British Virgin Islands.
- 11.2** Disputes: good-faith negotiations first; if unresolved within 30 days, the courts of the British Virgin Islands.
- 11.3** Changes to these Terms apply to new purchases only.
- 11.4** If any provision is found invalid, the remaining provisions stay in force. These Terms are made in English and Russian; if the versions differ, the English version prevails.
- 11.5** Licensor details: Sunpot Corporation, Reg. No. 1943422; address: Building 1, 2nd Floor, Tortola Pier Park, Wickhams Cay I, Road Town, Tortola, British Virgin Islands. Contact: support@sunpot.co.
